

2000 US Census Population Density

Vienna Township, Trumbull County, Ohio

Vienna Township
Comprehensive Plan
2008
DRAFT

1:40,000

Displayed is the 2000 population density by Census Block. The data shown was obtained during the US Census Bureau's 2000 Decennial Census. The values were categorized by the natural break method without consideration of any blocks that did not have population. The average population density for Vienna Township was approximately 161 persons per square mile. The average population density per square mile for Trumbull County was 360. Vienna Township is considered by the US Census to be primarily rural. Disclaimer: All information herein is deemed to be reliable but not guaranteed.
